KALDOR GENESIS

part ONE

by JASON WELCH

In the eastern spiral arm of the Milky way Galaxy is an M-Class arid planet called KALDOR , dominated by one capital city on western side of the blind heart dessert, below a mountain range .
There's Society is run by a HIGH COUNCIL and policed by adjudicators from company Central .
STENTON RELL of the KALDOR POLICE starts his day with earl grey tea and cinnamon bagel while sorting his schedule with other officers .
His schedule includes light bodyguarding duties, as a public relations exercise for company Central and a mission to track down the blueprints for V-O-C robots, a highly advance breed of robots used as servators to the human population .
He leaves the M ANTA residency and walks over a central plaza onto a rapid transit conveyor that whisks him through the city with other citizens in designer costumes by JUNE HUDSON, a rriving at KALDOR POLICE STATION.
RELL takes a travel-tube to his changing room where he puts on his blood red uniform with silver moon boots, white shoulder pads and a flowing white Cape.
COMMISSIONER MILES enters as silver Spa Squadron start there assignments.
COMMISSIONER MILES Moon boots and dinner suits and get to work .
The adjudicators leave to communication booths linked to magic eyes afixed to public places with tannoy speakers over fire exits to talk to citizens throughout the city.
COMMISSIONER MILES Go to Cyprus corners where a delivery has just arrived w ith a suspicious package and a dead body.The train has just arrived with workers from the water production plant from the blind heart desert .
RELL Isolate that package till I get there .
RELL takes a travel tube, arriving near the underground and walks up to security office
k eying in his passcode on the wall mounted entry coder. C enter manager BARKLEY SILVER is monitoring Passengers disembarking from the train that's just glided through the perimeter

wall of the city.
BARKLEY SILVER The train has just arrived RELL and I isolated the package.A cursory inspection says it's got some breeding units which were obviously dropped from high altitude and there was The Familiar debris along with the body of a KALDOR citizen in the uniform of a water treatment plant worker.
ADJUDICATOR PHILLIPS CITIZENS have just come off shift and are entering the city right now, what do you want me to do ?
RELL Terrific that means we could be up to our armpits in shapeshifting aliens quicker than you can say friend or foe.
BARKLEY SILVER None of the workers , I've questioned claim to known anything .
RELL T hat's the trouble even my informers in THE SONS OF KALDOR are keeping quiet about it.
BARKLEY SILVER Kids what do you do with them?
RELL I've got a meeting with COMMISSIONER MILES.
He takes a travel tube which whisks him in four directions over the skyline of KALDOR and d eposits him on the paved courtyard opposite COMPANY CENTRAL . He into company Central then straight to TARRANT'S offices.
TARRANT I was going to meet you at technical zone.
RELL That's as maybe COMMISSIONER MILES is waiting at street level .walks through glass doors into the lobby and across a royal blue tiled carpet ,using a n INTERCOM to TARRANTS office.
TARRANT Well done RELL, you made it before the six o'clock news, any chance of capturing the killer? .
RELL I found evidence that the rutons are getting in via the water treatment plant and may have infiltrated workers who've just come off the MONORAIL .
TARRANT he situations getting out of hand and I'm gonna have the galactic Federation breathing down my neck .
RELL I was just going to CENTRAL OPS, with his ID to put out an APB.
TARRANT With our security we'll pick him up.Let's go, MILES wants to show you his new traffic police.
They leave TARRANT'S office and over the royal blue carpet of the lo bby and out the glass doors of COMPANY CENTRAL.
Stepping onto the pavement , mingling with a throng of citizens

towards a junction .Striding through brightly dressed young people holding banners for the campaign for nuclear disarmament ..
RELL W hy do you encourage peace campaigners .I don't mind recruiting more offices but it just means more training when I want to get to ARCADE like everyone else on KALDOR.
TARRANT It was CARNELL'S idea that the Draconians have been threatened us with the nuclear missiles .
RELL But you can't tell the entire galactic federation that the DRACONIANS are threatening us with nuclear missiles .
TARRANT Fortunately CARNEL cleared it with a DRACONIAN ambassador first.
RELL And it's just a plan to keep the young younger people occupied waving banners around with improvised symbols from KALDOR art college .
TARRANT And they've spent hours in the arts and craft department of KALDOR university.
RELL They certainly cheers up the place. I think COMMISSIONER MILES is waiting on the corner with that new officer.
They reach a corner Junction and are greeted by COMMISSIONER MILES.
MILES Like you to meet GAVIN SAUNDERS one of my new transport police.
GAVIN SAUNDERS is standing on the corner below mauve lattice dome dominating ZONE ONE of the city .
H is costume is white with green floor length cape silver moon boots , with a green cross on his chest on a white tunic .
He's politely talking to a large breasted slim woman holding a banner with the symbol for the campaign for nuclear disarmament .
TARRANT How's the job going.
GAVIN SAUDERS Chicks love the uniform MAN.
COMMISSIONER MILES We're hoping that these new recruits shall be popular .
TARRANT CARNEL can deal with the news agencies .
RELL By the way ,If you see one of our new traffic police you can't have milk in a hot drink .
TARRANT You've got to have it black .
COMMISSIONER MILES But I always have milk.
RELL They're the rules First Master .

COMMISSIONER MILES Well next time I'll take a taxi.
T HEY WALK ACROSS A CENTRAL PLAZA TO A RAPID TRANSIT CONVEYOR AND JOIN CITIZENS WHO ALIGHT ROLLIN-ROADS THAT REACH 40mph ,
AS THEY HANG ONTO A RAIL THAT STOPS NEAR THE ARENA AND THEY WALK OVER A PAVED COURT YARD PAST WINDOW BOXES OF BEGONIAS AND CHRISANTHENUMS INTO THE SENATE BUILDING .
They entre the stadium and take there places o n maroon velvet fold up seats before a raised stage where HIGH COUNCIL of KALDOR legislate old shrapnel wounds.Above the raised stage is a sandy yellow velvet curtain displaying LCD monitors of the assembly where first Master LANDERCHILD is at a dutch-elm-lecturn.
LANDERCHILD Commander RELL has arrived to tell us what's happened to v31.
RELL V31 had duties to follow a human through the DIMENSION gate to his home quadrant,western spiral arm of our milky way galaxy.
LANDRCHILD First contact with the humans from that sector of the galaxy .
RELL While ERIC YOUNGBLOOD was having his induction on KALDOR ,blueprints were stolen from the panopticon archives.
CHIEF MOVER POUL Then we quarantined KALDOR to find the alien.
RELL V31 is now on there JUPITER CLICKNALOGIC capsule in geostationary orbit above the red eye of JUPITER .
CHIEF MOVER POUL The earth people are new to space exploration.
LANDERCHILD The HIGH COUNCIL of the GALACTIC FEDERATION can ask them later if they want to join us.
CHIEF MOVER POUL The balls in there court , but our immediate concern is the theft of data for construction of V-O-C robots.
RELL The SONS OF KALDOR have denied their involvement in the break in at central ops .
LANDERCHILD uses his wrist communicator to call up central operations and orders CASTAN LAGO to the stadium .
CASTAN LAGO ON MY WAY FIRST MASTER .
RELL I NEED A SPECIALIST IN ROBOT DESIGN.
LANDERCHILD LAGO go with RELL and take a wanderer

class starship immediately .
RELL OH AND THAT OTHER MATTER, this threat to galactic peace could threaten planet earth.
LANDERCHILD We can guide them .
RELL I'll tell v31 to start negotiations .
The delegates stand from there maroon velvet fold-up seats and leave the area, along a green laminated floor to travel tubes and ground rapid conveyor belts to take them back to there residences,or the commercial district psychedelic pink pussycat club ?
RELL finds technician LAGO waiting for him outside the ARENA .
RELL Ready
LAGO Please come with me to my habitat at CYPRUS CORNERS .
RELL OH you're a trustee for the company mate, going up in the world .

They take the elevator to the roof and then climb into a company shuttle that lifts off into the mid morning traffic.
The pre programmed flight plan flys through the centre of KALDOR, then lands on the top of cyprus corners ,a green-latiss sphere and residency for HIGH COUNCIL ,
CASTAN LAGO Welcome to my apartment RELL.
A SUPERVOC is stationed at the console monitoring communication traffic .
LAGO V56 , were leaving right now so shut down .
V56 we don't shut down any more LAGO you know that.
LAGO yes a figure of speech, since I upgraded you, now get your team together, where wanted at the space port THESE ARE my own supervoc, they don't power down and are independent.
RELL THE LATEST DESIGN.
LAGO And you're going in on this mission in uniform if we have to mingle with the general public I'm not going to be out done by you.
RELL CHICKS DIG THE UNIFORM.
LAGO I wanna uniform as well the full one like yours .
RELL i'LL HAVE ONE OF MY MEN BRING A UNIFORM TO THE SPACEPORT .
LAGO The full red uniform with silver boots, silver shoulder pads and floor length white cape .
RELL YES.

LAGO My team have predicted our chances of success and they're not high
RELL Yes that may be so but you know what companies like with all those new contracts for building and terraforming using V-O-C robots they don't want their Monopoly jeopardised .
LAGO And of course in the wrong hands they could be a lethal weapon .
RELL We haven't had an incident similar since STORM MINE FOUR many years ago .
LAGO what happened.
RELL A program left by TAREN CAPEL turned the robots into killers .
LAGO V56 YOUR ON ASSIGNMENT TO US AND WILL COLLECT V45 , YOU READY RELL.
They leave LAGO'S apartment in CYPRUS CORNERS and stride to an alcove with a metal cabinet calling a travel tube .
A clear perspex travel tube with a metal frame whisks them through the city in four directions and deposits them at the spaceport ,where a KALDOR POLICEMAN is waiting with a uniform for LAGO .
RELL THERE CASTAN ,THE LATEST DESIGN IN POLICE UNIFORM WITH ENHANCEMENTS.
They leave the spaceport and walk over the tarmac to the omega station shuttle and alight in the operations capsule ,and v56 starts the pre-programmed course up to omega station .
STENTON RELL Most of the travellers have had their ID checked but a RUTON can take on the form and identity of a human if they assimilate him .
LAGO HAVING YOUR LIFE ESSENCE AND GENETIC CELL STRUCTURE MIMICKED.
STENTON RELL VERY NASTY HE COULD HAVE GOT PAST OUR SECURITY .
LAGO My first proposal will be to make a tracker that analyses humans to be able to trace a RUTAN HUMAN HYBRID so they won't evade capture again .
They stride to an alcove with a four man flyer, a metal fram with clear perspex cabinet that opens from the top and calamber in, LAGO traps in while RELL programes the flyer to take them to OMEGA station .
The twin turbine jets lift the shuttle from the spaceport into the stratosphere and NEWTON drops the ball as they maneuver around OMEGA into the shuttle bay.The flyer lands on a pad lands on a platform, then a conveyor takes it to its docking bay alcove s .

inside the shuttle bay door and taxis to a recharge silo .RELL and LAGO wait for the air pressure to equalise then leave and enter the perimeter gantry with near KALDOR gravity, then along the central isle towards the bridge towards a zero gravity flight deck.
RELL I wish NEWTON dropped the ball on OMEGA, LAGO.
LAGO Lucky our uniforms are magnetic on this charcoal grey tiled carpet RELL .
.They walk along a charcoal grey tiled carpet using soft resin panelling as a guide till they step through sliding doors to the flight deck.
REll strides past V-O-C robots and COMM officer AUBREY MORRIS[GREEN-MINI-DRESS]
then through a hexagonal guard rail and flumps into his padded command chair
He ACTIVATES THE SHIPS TANOY .----ELISABETH CHERRY TO THE COMMAND BAY.
ELISABETH CHERRY is in the cafeteria eating a pack of salted peanuts,
when the entire crew here the announcement from tannoy speakers above all doors.
She exits out the cafeteria and across a lemon tiled carpet using soft resin panels to guide here to the bridge.
STENTON RELLtrotts through the hexagonal guard rail and strides past V-O-C robots .....
to travel tube ,arriving as CHERRY strides from the travel tube[MAUVE MINI DRESS]
ELISABETH CHERRY The VISCOUNT will come back to us?
STENTON RELL Once they've refuelled and restocked their bulk cruiser.
ELISABETH CHERRY I've instructed v31 on station at their JUPITER CAPSULE to power down and await orders.
STENTON RELL YOUR IN COMMAND UNTIL I RETURN ELISABETH
ELISABETH CHERRY AND HOW LONG IS THAT COMMANDER?
STENTON RELL JUST WHILE I GIVE A REPORT TO THE HIGH COUNCIL.
CHERRY walks past COMM officer AUBREY MORRIS[GREEN-MINI-DRESS]
and through a hexagonal guard rail to flump onto the command chair

of OMEGA STATION.
CAPTAIN ELISABETH CHERRY ALL CREW AS OF NOW WE'RE IN CONDITION PURPLE.
RELL Has the Odyssey been refilled and ready for a long range reconnaissance operation as per orders .
CAPTAIN ELISABETH CHERRY Yes commander .
They walk through the main gantry then take a right to the commercial side where a variety of companies rent capsules and other spaceships are birthed ,then through the airlock of WANDERER ODYSSEY through its operations room .
RELL takes the cockpit with V56 as copilot and LAGO sets up a containment area .
STENTON RELL V56 look for a plasma trail leaving omega station and plot across using the strongest one .
LAGO Sounds like a long shot if we're going to find the escaping hybrid .
V56 I have one plasma trail .
STENTON RELL Feed it into my coordinates ,prepared to get underway burn every 10 seconds on my Mark.
Just then he gets a call from the bridge of the omega station.
CAPTAIN ELISABETH CHERRY I think we've just had a commercial ship leave just before the call came out to check all departures .My security checks have been done on the crew.
STENTON RELL What's the name of the ship .
CAPTAIN ELISABETH CHERRY It's a sailing yacht called the Tiger moth. I'll give you her flight plan .
STENTON RELL That's great at this rate we should be able to catch up with it soon .Let's push the safety margin V56 burn every 5 secs we got some catching up to do .
TAKE OVER V56.
REL LEAVES THE PILOT'S SEAT AND JOINS LAGO IN THE GALLEY .
LAGO THE RUTON took a course out of our sector, and was either picked up or is trying to evade capture .
REL EXACTLY those small pursuit ships have a limited range so he must have had a prearranged rendezvous .
LAGO AGREED but if he makes it to a waiting ship the trail goes cold.
RELL We're using a plasma trace to follow the missing shuttle and we have a solar. yacht to check along the way, commercial ship TIGER MOTH .
V56 I have a ship nearby in our trajectory COMMANDER .

RELL leaves crew quarters and takes his place in the cockpit .
RELL Tiger moth we're in pursuit of a criminal. Can you check personnel and report it to KALDOR POLICE .
ROBAR THIS IS PRIVATE SHIP TIGER MOTH on a journey to enter a SOLAR YACHT race to start near GLADA PRIME .
RELL Thank you TIGER MOTH we are in pursuit of a dangerous alien , if sighted call us or send a message to KALDOR.
ROBAR Will do , though i have senior founding family citizens and we're about to test the solar sails for the yacht race ,have no time for inspection .
The ODYSSEY passes the solar yacht and speeds past at high acceleration towards the neutral zone .
V56 The plasma trail finishes here commander, and that shuttle enters hyperdrive, or was picked up by another ship.
REL Scan the area for resent traffic, then plot a course for the planet GALDA PRIME
V56 No other ships have entered this sector commander.
LAGO Then the RUTAN must have took a course to the only M-CLASS PLANET in this sector .Luckily I've met the president of GLADA PRIME and he'll help.
RELL A hive for soldiers of fortune, they don't call it the planet of tasteless pleasures for nothing .
LAGO A shape shifter, will take on any humanoid form, and blend in.
V56 PREPARING TO ENTER HYPERJUMP COMMANDER.
RELL Better strap in for the journey.
AFTER an hour at maximum speed the ODYSSEY comes out near planet GALDA PRIME.
REL leaves the crew quarters and takes the communications console.
RELL This is the ODYSSEY requesting landing .
GALDA PRIME control You are clear to land at the spaceport.
RELL PILOT the ODYSSEY into the atmosphere , and home in on the spaceport.
The ODYSSEY flys into the atmosphere and is buffeted by the slipstreams through a high cloud bank. As they break through the main viewer shows the sprawling capital city with it's HIGH TOWERS and walkways, sky cars flying across .

V56 I have the spaceport on positive track .
V89 going over to spaceport control,.
The ODYSSEY glides down through high buildings to the far side of the city,and is brought in for a controlled landing . A ground car is waiting as they disembark and are greeted by robot k10.
The car docks with the spaceport and they walk out into a central plaza, with many tourists departing and arriving. Following K10 they go to a help point and are given clearance to enter the city.
They leave the spaceport and take a rolling conveyor towards town centre with other tourists following the robot, who has volunteered to guide them.
LAGO how are we going to find a shape shifting hybrid in a large city where he can blend in and hide.
RELL The first thing we have to do is tell the police were tracking a fugitive from KALDOR.
From registration they follow travellers from the spaceport onto an escalator and then a conveyor belt into the city and see Viewing screens showing the latest news .
And the latest news on the GALDA PRIME government shows a large swing to the liberals, and the swearing in of SYLVESTER SNIGGLEY. PRESIDENT TRAYNOR HAS RESIGNED FROM POLITICS.
LAGO THAT'S WHO WE HAVE TO CONTACT RELL ,can you get us to a phone.
K10 I can send a message to ex president Trynor.
LAGO he'll have enough influence to find our RUTON.
They follow the robot through a throng of people and walk up stone steps to the central police station. They walk through a central hall with stone pillars and high ceiling to a wall mounted touch screen console.
RELL We are on a mission from KALDOR pursuing a dangerous alien, using the identity of a librarian. We'll need your help to track him before he kills again.
LAGO That should get there attention
A DOOR SLIDES BACK AND AN OFFICER EMERGES ASKING FOR THERE ID
OFFICER GAN FOLLOW ME AND I'LL TAKE YOUR STATEMENT
They are lead through a bright hallway with green tiled carpet and polystyrene tiled celling illuminated by striplights to interview rooms .
GAN I'LL LEAVE YOU IN THE WAITING ROOM WHILE I REPORT THIS .

Lago I WANT TO SEE THE SOMEONE IN AUTHORITY.
GAN IF YOU DON'T WAIT THERE YOU'LL HAVE PLENTY OF OPPORTUNITIES TO SEE SOMEONE IN AUTHORITY FOR THE FORESEEABLE FUTURE, DO I MAKE MYSELF CLEAR.
THEY WAIT IN THE BLUEROOM FOR GAN TO RUN A ID CHECK.
LAGO Stuffy lot these men of GALDA PRIME.
RELL Yes that's as maybe but you can't antagonise them .

LAGO You checked in with LANDERCHILD before setting down didn't you RELL.
RELL YES HOPEFULLY WE'LL HAVE GANS COOPERATION WHEN HE RETURNS.
GAN COMES BACK INTO THE INTERROGATION ROOM.
GAN BE AT PEACE WITH THE WORLD CITIZEN WHILE I TAKE YOUR STATEMENT .YOU HAVE THE ID OF THIS MAN YOUR CHASING .
RELL yes but he's a RUTON trying to get back to his home planet with our ROBOT DESIGNS, and may kill to carry out his mission.
GAN I'VE NOT BEEN INFORMED OF THIS.
LAGO That's why we've come to you .
RELL This shape shifting alien could soon be going from body to body leaving a trail of dead citizens .
LAGO They can kill on touch and assume the identity of their victim.
GAN Have you a suspect for me to run an ID check.
GAN TYPES IN THE ID OF ALL VISITORS FROM KALDOR CITY .
GAN I'VE ONE KALDOR CITIZEN THAT MATCHES YOUR DESCRIPTION .
They take an elevator to the roof of the police station and grab a sky car and head for the hotel.
LAGO Lets go, he won't hang around, he'll try to get off world.
Just then GAN receives a call from dispatch, saying a body has been found at the spaceport of a passenger on an outward flight to MAGRATHEA.
RELL Hold the flight and quarantine the area.
GAN I'll need the flight delayed, till we get there and send the ID of the victim.
He gets a description on his monitor.
GAN He's a brush salesman on a conference on his way

back home.
The flyer lands at the spaceport and they run into the reception and up to security, GAN SHOWS HIS id,,,,and they walk out to the commercial shuttle bay .
GAN uses his wrist communicator to pilot of the space shuttle preparing for horizontal take off.
GAN Captain FINCH, tell the stewards to go through the passengers with this photo of our suspect .
GAN, RELL and LAGO trott up the metal esculator into the space shuttle and great a stwardess in mauve uniform with brown chestnut hair tied in a bun.
CHARLOTTE GRAHAM THE BRUSH SALESMAN IS IN D17, left isle .
They walk down the isle to D17 past us, where REGINALD STYLES, brush salesman is looking at a catalogue.
GAN A re you REGINALD STYLES brush salesman.
STYLES Yes I am officer what's the problem.
LAGO Y ou're a RUTAN escaping with the blueprints for our V-O-C robots.
Just then REGINALD STYLES changes shape into a green jelly and flys towards the exit
RELL STOP THAT ALIEN.
A passenger near the main door gets up and pulls his suitcase open as RUTAN crashes into it .The man closes the suitcase and places it in the isle near the door .
[THERE YOU ARE OFFICER IT SEEMS YOUR FUGITIVE IS IN MY SPARE SUITCASE.
RELL and his police thank the man and passangers and collect the suitcase, then take an esculator from the space shuttle onto the runway and walk over to the ODYSSEY.
RELL PREPARE TO LEAVE V56.
ODESSEY along the runway and zoom up the stratosphere through a cloud bank at high velocity till there in open space, then plot a course for KLADOR .
RELL The question now is weather the ruton has the blueprints on him .
LAGO LET'S talk to him
They leave the flight deck and walk over to the lounge area where Lago pulls the suitcase onto the table and opens the lid.
RELL TELL ME WHERE THE BLUEPRINTS ARE AND I'LL BE LENIENT ON YOU .

RUTAN I claim my rights under the GALACTIC FEDERATION treaty .
REL YOUR NOT EVEN A CITIZEN, YOU'RE A SHAPE SHIFTING ANIMAL.
RUTAN That why we need your V-O-C ROBOTS
LAGO Y ou killed that brush salesman from MAGRATHEA.
RUTAN IT'S OUR BIRTHRIGHT TO TAKE CONTROL .
LAGO YOUR REPRESENTING YOUR ENTIRE RACE AT YOUR TRIAL.
RELL AND YOUR TRIAL HAS STARTED.
THEY WATCH LIQUID RUN DOWN THE SIDE OF THE RUTAN SPHERE.
RUTAN ONE OF MY AGENTS IS TAKING THE BLUEPRINTS BACK TO OUR HOMEWORLD EVEN AS WE SPEAK.
RELL IF THOSE BLUEPRINTS HAVE GOT AWAY THEN COMMAND WILL PUT OUT AN ALERT.
LAGO IT WILL TAKE THEM TIME TO USE THE BLUEPRINTS TO CREATE HOSTILE V-O-C .
RELL CAN I GET YOU ANYTHING, I KNOW NOTHING OF RUTAN BIOLOGY.
RUTAN SPRAY ME WITH DISTILLED WATER.
THE GLOWING SPHERE SEAMED TO REPEL THE WATER IN A BRIEF CRACKLE OF ENERGY THEN IT FLOWS DOWN THE SIDES OF IT'S SPHERICAL BODY .
RELL walks to the flight deck and takes the pilot's chair .
V56 The ODYSSEY is coming out of hyperdrive.
RELL plot a course to OMEGA STATION .
V56 I have a homing signal and OMEGA station ON POSITIVE TRACK .

The Odyssey docks onto OMEGA station and they disembark ,where they are greeted by CAPTAIN ELISABETH CHERRY .
[Welcome back commander , I hope the mission was successful]
LAGO W e have the RUTAN in this suitcase.
RELL It killed a travelling salesman from MAGRATHEA and was trying to get off-world .
CAPTAIN ELISABETH CHERRY And I have the crew from earth having an induction with DR POLASKI.
RELL Great,send them to me when there ready, I have to get this alien into a holding cell on KALDOR.
RELL and LAGO walk through the station and use an intercom to

the shuttle bay, where they alight shuttle REMUS.
A conveyor takes REMUS out of it's silo while the bay depressurizes and the cargo doors open.RELL stears the ship out an around the space station then sets course for the stratosphere, and it plunges into the atmosphere .
REMUS is bufetted by slipstreams as it enters a cloud bank and then swoops out to fly over the blind heart dessert , then across the perimiter wall of KALDOR CITY.
Flying high over the horizon they land on the spaceport and RELL powers down as LAGO takes the suitcase and walks out of REMUS followed by SV7 v56 towards terminal one while RELL checks in with KALDOR POLICE .
They take a travel tube to COMPANY CENTRAL and arrive at LANDERCHILDS office .
v78 FIRST MASTER LANDERCHILD IS EXPECTING YOU COMMANDER
LAGO THANK YOU V78, TAKE THIS CRIMINAL TO A HOLDING CELL , OPEN HIS SUITCASE AND WATER HIM AND WAIT FOR ME TO COLLECT HIM .
THEY GO THROUGH THE DOORS WHERE LANDERCHILDS IS WAITING ON A LOISE ESCARGO SETTEE FROM IKEA.
LANDERCHILD W ell done to the pair of you.
RELL IT'S A MIRACLE BUT WE GOT HIM FIRST MASTER.
RELL he flew to GALDA PRIME,and killed the moment he got a chance to assume the identity of a travelling salesman and escape to his homeworld.
LAGO I have to commence research into a mobile tracker .
LANDERCHILD We'll back you technician LAGO, requisition all the men and material you need.
RELL Make it top priority or soon they'll be able to infiltrate our society .
LANDERCHILD I'VE HAD SILVESTER SNIGLEY OF GALDA PRIME WITH A REPORT OF YOUR ACTIVITIES.
RELL NO COMPLAINTS I HOPE.
LANDERCHILD FAR FROM IT, I'VE A NEW ORDER FOR SUPER VOC AND HIS COMMENDATIONS ON A JOB WELL DONE.
LARGO ADVISED THAT ALL VOC STAY ON 24/7 THEY DON'T SHUT.
LANDERCHILD THE NEW DESIGN IS APPROVED BY

US AND THEM.
LARGO I also want the files on TARON CAPEL in order to counteract his programming and prevent the risk of V-O-C becoming dangerous .
L ANDERCHILD Then I'll send a memo to the KALDOR inner circle, keep me informed .
LARGO AND THE NEXT GENERATION WILL UPLOAD TO A CENTRAL MAINFRAME AT THE END OF THERE WORK SHIFT.? IN THE MEANTIME I'LL GET TO WORK ON A RUTAN TRACKER THAT WILL FIND THESE HYBRIDS FROM WITHIN KALDOR CITY .
LANDERCHILD THE EMPIRE AWAITS YOUR LATEST DESIGNS SENIOR TECHNICIAN LAGO.
JUST THEN SV10 COMES INTO LANDERCHILDS CHAMBERS WITH A MESSAGE
SV10 The crew from the viscount have touched down at KALDOR.
RELL I'll meet them, get them a tour of the city and then bring them to you.
LAGO . YOU'LL HAVE TO TELL THEM OF THE RISK THEY TAKE BY COMING HERE.
LANDERCHILD The ruton menace could spread to earth as all human planets are a target.
LAGO Then you can bring them to the laboratory as I start tests on this RUTAN.
LANDERCHILD THIS SESSION IS CLOSED .
